

For Immediate Release

March 31, 2020

**Test MADRIX 5 professional until June 01, 2020**

MADRIX 5 Software has always been available as a demo version for everyone to try out the award-winning pixel mapper at the convenience of their own work machines.

MADRIX 5.1 launched the additional 'preprogrammer' software license to facilitate show and project preparation without the need for a full output license.

A new way to fully test MADRIX 5 is now being introduced as an additional resource to support the current workflow needs of operators, lighting designers, VJs, and project companies around the world.

MADRIX 5 professional is an extensive software license, which is available free of charge as a time-limited license that works until June 01, 2020. It is fully functioning within this time frame. The only requirement is to make a small, one-time purchase for a MADRIX KEY from a local dealer. This USB dongle then remains universally usable for the range of MADRIX software products and licenses.

MADRIX 5 professional enables major production value as it unlocks the output for 65,536 DMX channels across its various supported industry output protocols (128 DMX universes, for example) as well as 1,048,576 DVI voxels (a pixel resolution of 1,024 x 1,024, for example).

Please e-mail [info@madrix.com](mailto:info@madrix.com) for more information and we will be happy to help you get started.

## About MADRIX®

Benefit from years of experience and industry knowledge. inoage® develops lighting software since 2005. Our dedicated team created the award-winning controller MADRIX® 5. We are located in the beautiful city of Dresden. MADRIX® is all about powerful yet simple products for creative LED lighting. This includes compelling tools for lighting management, monitoring, and control. We are proud to put our newest innovation into your hands. MADRIX® products are proudly designed, engineered, and made in Germany. We are creating high-quality products for you that are easy to use and reliable. Innovative features will bring you the best results. And opting for such highly manageable products means that you can drastically reduce on-site support; and thus your time and costs.
